

TB3400

TECHNICAL SPECIFICATION

TB3400

The TB3400 tracked conveyor belt is characterized by a simple and reliable technology, quick to set up and operate, it reduces maintenance costs and facilitates the loading, feeding and discharging operations with crushers, screeners or any other processing equipment. The TB3400 model does not require any other mechanical rig or operator. This way, not only does it allow to work in limited access sites and unreachable, but it decreases business operating costs as well.

CONVEYOR

TECHNICAL DATA

CONVEYOR BELT ON TRACK

Belt length
600 mm

Belt width
6400 mm

Belt speed
1,86 m/sec.

Pile height
3200 mm

ENGINE ISUZU

Power
21\28,5 kW/Hp

Consumption
5,5 L/h

Cylinder
N°3

Cooling
Water

RUBBER CRAWLED TRACK

Length
2100 mm

Width
300 mm

STANDARD MACHINE

Remote control on track and belt running.

WEIGHT

Standard weight 2600 kg
