

1032

Internal circlip pliers, straight pattern, PVC-coated handles

UNI 7914 DIN 5256

Beta's internal circlip pliers 1032 are made from spring steel. This material provides remarkable resistance to breakage. To add strength and durability to pliers, straight jaws and tips are moulded into a single body.

Features:

- Cathaphoretic painting, a treatment that ensures high protection against corrosion and chemical agents
- Made from silicon spring metal
- Tips and beaks moulded into one body
- Cold forging for increased collet toughness
- PVC handles for a secure grip

Range of diameters of circlips for which they are indicated is printed on pliers. This will make it easier to identify correct pliers, for effective working.
