FVS2000

The Foremost 2000 can be mounted on a tridem or quad axle chassis. These units feature 2000 gallon water tanks, 13 yard debris bodies and a 70" aluminum, heated, lit and insulated van body. Available with a standard Robuschi RBDV125 blower or the optional Robuschi RBDV145, which provides 6400 CFM and full vacuum. We recommend the Robuschi RBDV125 for most applications. This blower provides plenty of power, costs less and will save on fuel and weight.

The FVS2000 has ample storage room, featuring a shelving unit and microwave on the driver's side. The water system is comprised of a CAT 3560 wash pump, 740,000 BTU boiler and full winterization features.

The 26' rear mounted extendable boom is controlled by a wireless Omnex controller, which also allows for control of the offloading, vacuum, wash and vehicle RPM functions. This boom is stored on the rear fender with the dig tube attached for convenient digging to 18 feet of depth prior to adding any extension pipe. As standard with all Foremost models, each unit comes equipped with an extra vacuum filter and all other oils and filters for the first service change.

An excellent unit for Oil & Gas and Industrial applications.
