

Technical Specification Sheet

Boulder & Stone Scissor Grab ^[MSL40] [200kg]

Lift dense and irregular shaped boulders and kerb stones with this handy manual boulder & stone scissor grab.

Capable of handling stone units up to 200kg, the Boulder Stone Lifter is a flexible tool that can be used as a below-the-hook lifter or as a two-man device.

This manual stone lifter has a 400mm capacity clamping range and is available with either rubber lined clamping faces or a metal tip to suit different stone finishes.

For heavier stone units, take a look at our powered vacuum lifter range.
