SkyGlazier®

Raising Productivity to a Higher Level

Get your materials to the job site faster and more efficiently. Use JLG's glass and panel tray, the first and only factory-approved glass and panel tray. Combined with industry-leading platform capacity, you can get materials to the work site and improve productivity, while helping to protect panels from damage. You don't need cranes or scaffolding on many jobs, plus you'll be able to lift multiple panels.

Platform Capacity

1,000 lb (453 kg) restricted capacity provides enough room for multiple panels. The side-entry platform improves entry when loading materials or when multiple operators are in the platform. This allows for panel storage to the rear of the platform.

Features

- **Helps Prevent Damage to Panels—**
The system includes a foam-padded railing, a strap to secure panels and a rubber coated tray.
- **Reduce Worker Fatigue and Lost Time.**
Reduce incidents of operator injury from manual lifting.
- **Eliminate Safety Violations.**
Use a manufacturer-approved panel-carrying system, integrated into the platform.

Specifications

Maximum Tray Capacity	250 lb (113 kg)
Maximum Material Size	32 sq ft (9.75 m²)
Tray Dimensions	
Length	72 in. (1.83 m)
Width	6 in. (15.2 cm)

An Oshkosh Corporation Company

Capacity Zone	Tray Capacity	Additional Platform Capacity With maximum weight in tray
500 lb (227 kg)	150 lb (68 kg)	250 lb (113 kg)
1,000 lb (454 kg)	250 lb (113 kg)	500 lb (227 kg)

Due to the shift in the center of gravity caused by the tray installation, the capacity combinations shown above are required for factory approval. Removing the tray restores original machine capacity specifications.

Available on these JLG Models:

Articulating Boom Lifts

600A, 800A, 1250AJP

Telescopic Boom Lifts

400S, 600S, 800S, 1200SJ, 1350SJP
